Dear Parents-

I am looking forward to teaching your children Chemistry this year, and hope they are just as excited as I am with the experiments and practical lab experience we will be sharing.

We will be using the Exploring Creation with Chemistry 2nd edition text, as well as supplementing with some other lab work where appropriate to help reinforce some of the more difficult concepts. Each module will take approximately 2 weeks to complete, and I've included a suggested schedule for pacing. This is just a guideline so that the students know when work is due, but I do feel it is important to devote some time daily to science. Some of the concepts require repetition to grasp firmly.

If you would like your child to receive a grade in my class, please complete and return the form at the bottom of the grading scale.

I would encourage you to let me know of any questions or concerns as soon as they arise and I will do the same. Feel free to call me or to communicate by emails (my preferred method). I like to take care of small problems quickly as they tend to get bigger over time.

Thank you again for this wonderful opportunity of teaching your child.

Shelia Talbott
